

Ardanis simplifies software development by combining agile processes, evolutionary architecture and automation. We help businesses design, develop and deploy software they can build their future on.

We are seeking a backend software developer who is passionate about software craftsmanship.

At Ardanis, we believe that simple and elegant solutions are the driving force of successful businesses and as such we employ high level coding standards, well tested code, microservices, automation and some extreme programming practices to achieve that.

Our work is done in fortnightly Scrum sprints and once work is completed and thoroughly tested, it is demonstrated to our stakeholders before getting released. We try to release as often as possible, often on a daily basis.

As part of your responsibilities, you will be part of a team who develops software and participates in grooming, retrospective and design meetings so your opinion and perspective is important. Your work will be expected to be well unit and integration tested. You will be responsible for producing quality software with mentoring, support and encouragement from the ardanis team.

Responsibilities

- Participate in Scrum ceremonies
- Collaborate with our backend team to develop new functionality
- Contribute your ideas in design meetings

Qualifications

- Third level qualification
- Good grasp of object oriented programming concepts and clean code
- High level knowledge of at least one programming language
- Comfortable working with SQL and at least one relational database
- At least 1 year of professional experience

Desirable if

- You know C#
- You love automation and are comfortable in a scripting language
- You have experience of distributed asynchronous systems
- You have knowledge of NServiceBus
- You have a Computer Science Degree
- You have worked with SQL Server

Ardanis was founded in Dublin in 2016 and we are based in Dublin 2. Our experienced and skilled team provide a friendly and encouraging atmosphere which offers an excellent opportunity for candidates to develop their career. We also offer flexible working conditions such as an occasional working from home option.

If this sounds interesting (and you are not a recruiter) please apply at hiring@ardanis.com.
